Why shooting with just a 35mm lens WILL improve your photography. By Steve Huff. I originally wrote this article to end my Fuji X100 camera review but decided to expand on it and publish it on its own. When the X100 and even the Leica X1 were announced and released, many people were complaining that it did not have a Zoom lens, or have the capability of adding another lens.

In optics, an aperture is a hole or an opening through which light travels. More specifically, the aperture and focal length of an optical system determine the cone angle of a bundle of rays that come to a focus in the image plane.. An optical system typically has many openings or structures that limit the ray bundles (ray bundles are also known as pencils of light).
