1. Introduction. The global food system faces significant stressors in population growth, limited land and water resources, rising demand for animal products, overreliance on fossil fuels, and a changing climate (Foley et al., 2011, Neff et al., 2011). In addition, seafood production has changed substantially over the last few decades.

Environmental health impacts of feeding crops to farmed ...

1. Introduction. The United Nations' (UN) 2014 International Year of Family Farming provided an opportunity to reflect on the status of family-based agriculture throughout the world in relation to food security, socio-ecological sustainability, and equitable economic development.

Our work focuses on research and discovery at the interface of macroecology, conservation, and global change. It starts with discovery but is about more than that - we are looking for ways to use discovery to improve conservation prospects for biological diversity during the current period of rapid human-induced climate change and habitat loss and improve predictions of vector borne disease ...
