Abnormal Psychology By Nolen Hoeksema

Susan Nolen-Hoeksema (May 22, 1959 – January 2, 2013) was an American professor of psychology at Yale University. Her research explored how mood regulation strategies could correlate to a person's vulnerability to depression, with special focus on a construct she called rumination as well as gender differences.

Susan Nolen-Hoeksema - Wikipedia

Abnormal psychology is the branch of psychology that studies unusual patterns of behavior, emotion and thought, which may or may not be understood as precipitating a mental disorder. Although many behaviors could be considered as abnormal, this branch of psychology typically deals with behavior in a clinical context. There is a long history of attempts to understand and control behavior deemed ...
