1.5 Quick Reference Guide - download.amd.com

Overclocking in the context of computing devices refers to making them "run faster" than originally intended. More specifically it is the configuration of computer hardware components to operate faster than certified by the original manufacturer, with "faster" specified as clock frequency in megahertz (MHz) or gigahertz (GHz). Commonly operating voltage is also increased to maintain a component ...

Cinebench Scores are a great way to get an impression of how fast a CPU is in different types of workloads. No matter if you are planning on building a Computer for 3D Rendering, Gaming, Streaming or would just like to see how different CPUs compare to each other, a clean Cinebench Scores list of the most current CPUs, frequently updated & neatly sortable, should put a smile on anyone's face.

Cinebench R15 Scores (Updated Results) - CG Director

WHATEVER YOU DO DON'T USE CORETEMP. I just tried it out at the recommendations off here and a couple other sites. It did come up running, and looked nice, however, within moment McAfee found 3 other things it installed that were trojans, and it changed my home pages, search pages, and added safesearch, all of which it never asked me to do.

Best CPU monitoring program | Tom's Hardware Forum

For me what matters is the cost of energy , size, price and obvious quality. The technical support and updates of drivers is very important. Either AMD or Nvidia is irrelevant because the software and applications are exactly the same.

Radeon R9 270 vs GeForce GTX 750 Ti - GPUBoss

AMD's X470 chipset doesn't offer too many advantages over X370 but there are a couple of features (Precision Boost Overdrive and StoreMi for example) plus better future support for these boards in ...

How To Build The Best Gaming PC For \$1000 - forbes.com

Introduction. Very few displays reach the status of being legendary in the market, but the Asus ROG Swift PG278Q has been so popular since its release in July 2014 that it is simply known by many now as the "ROG Swift". It's still one of the best gaming screens on the market today and offered the kind of performance features which serious gamers have been looking for since it was first announced.
