January 2, 2019. WHAT BOEING NEEDS to build isn't a fancy new long-range widebody. What it needs to build is a replacement for the 757. When it debuted in the early 1980s, the twin-engined 757 was ahead of its time, and it went on to sell quite well until the production line closed fifteen years ago.

The 787 is a good looking plane from most angles but I'm not too sure about the nose. I'm not sure if it's got something to do with how low the plane sits on the ground, but it looks more like there is no nose, as if the designers were at the end of a long day at work and just decided to draw a big, lazy curve from the top of the fuselage to the bottom.

### **It Looks Like the Future. Up Close and Personal With the 787.**

Figure 1.1 presents data from a related study (Griffin & Buehler, 1999, Study 1) where students reported probability estimates for their best guess completion times for 10 current projects across their academic and personal lives. Once again, about 45% of the projects were completed, compared to an average confidence level of 73%. The calibration plot reveals two interesting patterns: First ...
