The Hubbert peak theory says that for any given geographical area, from an individual oil-producing
region to the planet as a whole, the rate of petroleum production tends to follow a bell-shaped
curve. It is one of the primary theories on peak oil.. Choosing a particular curve determines a point
of maximum production based on discovery rates, production rates and cumulative production.

The area of study known as the history of mathematics is primarily an investigation into the origin
of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical
methods and notation of the past. Before the modern age and the worldwide spread of knowledge,
written examples of new mathematical developments have come to light only in a few locales.
