Practice Bulletins - ACOG

BACKGROUND AND PURPOSE: RCOG and ACOG have differing definitions of fetal growth restriction
RCOG: Estimated fetal weight <10th percentile or abdominal circumference <10th percentile
ACOG: Estimated fetal weight <10th percentile Blue et al. (Obstetrics & Gynecology, 2018)
compared the efficacy of these two methods of predicting small for gestational age (SGA) birth
METHODS: Retrospective ...

RCOG or ACOG for Predicting Small for Gestational Age ...

Fetal growth restriction alone is not an indication for cesarean delivery. The optimal timing of delivery of the growth-restricted fetus depends on the underlying etiology of the growth restriction (if known) as well as the estimated gestational age. Definitions: Grades of Evidence

Fetal growth restriction Clinical Practice Guidelines

CLINICAL PRACTICE GUIDELINE FETAL GROWTH RESTRICTION 5 1.20 In cases of isolated FGR (EFW <10th centile and normal UA Doppler), delivery can be delayed until at least 37 weeks, and even until 38-39 weeks gestation.

CLINICAL PRACTICE GUIDELINE FETAL GROWTH RESTRICTION ...

OBJECTIVE: The Royal College of Obstetricians and Gynaecologists (RCOG) defines fetal growth restriction as ultrasound-estimated fetal weight less than the 10th percentile or abdominal circumference less than the 10th percentile; the American College of Obstetricians and Gynecologists (ACOG) defines fetal growth restriction as estimated fetal weight less than the 10th percentile alone.

A Comparison of Methods for the Diagnosis of Fetal Growth ...

"Fetal Macrosomia," issued by ACOG in November 2016, addresses the management of fetal macrosomia, a type of excessive fetal growth that is a common complication of maternal diabetes. The document reviews the possible complications of suspected fetal macrosomia and available methods for diagnosis. Read the Practice Bulletin: Fetal Macrosomia
