Master Excel with Wall Street Prep's Excel Course

Features of stoichiometric models. As shown in Figure 1a and b, the stoichiometric models exemplified by flux balance analysis (FBA) and metabolic flux analysis (MFA) are applied to solve intracellular fluxes, using extracellular metabolite consumption or production rates as constraints []. Models are structured with small or large networks, stoichiometric coefficients and reaction ...

Mechanistic modeling and applications for CHO cell culture ...

Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination of the optimal solution.
