Thank you for this post, exactly what I was looking for! I am planning to use one of those cheap Chinese apad devices for a home controller (combining wifi, storage, sound and a good 7in touchscreen for around Â£50), but was not sure how to connect it to the other nodes.

Android USB Host + Arduino: How to communicate without ...

Passcodes. Tap the down indicator to get a one-time passcode for login. This works anywhere, even in places where you don't have an internet connection or can't get cell service.. If the account is a Duo native account (meaning you enrolled this device into Duo and activated the app for Duo Push), then the passcode shown is valid until used.Tap the arrows to generate a new Duo passcode.

Rooting is the process of allowing users of smartphones, tablets and other devices running the Android mobile operating system to attain privileged control (known as root access) over various Android subsystems.As Android uses the Linux kernel, rooting an Android device gives similar access to administrative permissions as on Linux or any other Unix-like operating system such as FreeBSD or macOS.

Rooting (Android) - Wikipedia

Android is a mobile operating system developed by Google.It is based on a modified version of the Linux kernel and other open source software, and is designed primarily for touchscreen mobile devices such as smartphones and tablets.In addition, Google has further developed Android TV for televisions, Android Auto for cars, and Wear OS for wrist watches, each with a specialized user interface.

Fragments Part of Android Jetpack. A Fragment represents a behavior or a portion of user interface in a FragmentActivity.You can combine multiple fragments in a single activity to build a multi-pane UI and reuse a fragment in multiple activities. You can think of a fragment as a modular section of an activity, which has its own lifecycle, receives its own input events, and which you can add or ...
