FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

It's not clear when kratom use began, but the practice is thought to be ancient. [1] [2] In its native growing regions, leaves from the plant may be used to numb aches and pains, soothe fevers, treat diarrhea, manage diabetes, and alleviate addiction. They have also been applied as poultices to wounds or spread across the abdomen to drive out worms.

Toxic Sunburn Protection. Conventional sunscreen is loaded with chemicals, including parabens, well-established carcinogens, and oxybenzone, an endocrine disruptor that may generate free radicals when exposed to ultraviolet light.. Some researchers even suspect oxybenzone to be the hidden cause of the increase in melanoma, although most studies have found no such link.
