Orion's Deluxe Off-Axis Guider lets you image and guide simultaneously through the same astrophotography telescope, eliminating the need for a separate guide scope; Eliminates tracking problems caused by using a separate guide scope such as differential flexure and mirror shift, and also helps reduce imaging setup time and overall weight

Orion Deluxe Off-Axis Guider for Astrophotography | Orion ...

The Off-Axis Guider (OAG) requires a telescope, imaging camera, autoguider, and a mount tracking equatorially with autoguiding capability. You should already be familiar with these items before using the Off-Axis Guider. Refer to Figure 2 to familiarize yourself with the OAG.

OFF-AXIS GUIDER - Amazon Simple Storage Service

This document compares the use of a Guide Scope with the use of an Off-Axis Guider, two popular methods for guiding a telescope mount for long-exposure astrophotography. As the examples shows, the off-axis guider eliminates problems of differential flexure in Newtonians and SCTs, while a Guide Scope can be easier to use in practice.

Guide Scope versus Off-Axis Guider analysis

The Off-Axis Guider is an essential astroimaging accessory for long focal length telescopes that require the most accurate guiding possible. The Celestron Off-Axis Guider uses a prism to intercept a small portion of the telescope's focal plane (outside the field of view of the main imaging camera)
