Do not have them make catapults for the Angry Birds Parabola Project. This will take entirely too much time on things unrelated to the standards you are supposed to be teaching. If this is the version of the project you want to do then partner with a shop class or art class where creating the catapult will meet a standard for that teacher.

We have just spent a week working with quadratics in MPM2D and today I had students create their own angry birds level. The only real requirement was for them to create at least two flight paths and model them with quadratic equations. I was hoping to see how they relate the equation to the graph. This worked out better than expected.
