Ageing or aging (see spelling differences) is the process of becoming older. The term refers especially to human beings, many animals, and fungi, whereas for example bacteria, perennial plants and some simple animals are potentially biologically immortal. In the broader sense, ageing can refer to single cells within an organism which have ceased dividing (cellular senescence) or to the ...

Ageing - Wikipedia

What better place to present a vision for a 'super-smart society' to the West, which you call Society 5.0 than Germany, the land of Industrie 4.0 or Industry 4.0?. That's exactly what CeBIT 2017 partner country Japan is doing at the annual gathering of the German, and increasingly international, tradeshow/conference.

Society 5.0: the big societal transformation plan of Japan

Society 5.0 represents the 5th form of society in our human history, chronologically following hunting, farming, industry, and information. The Fourth Industrial Revolution is creating new values and services one after another, bringing a richer life to all.

Aging of Population Leonid A. Gavrilov and Patrick Heuveline This is a manuscript of our article in The Encyclopedia of Population. New York, Macmillan Reference USA, 2003. [Note: This original manuscript is slightly different from the final publication because of small editorial changes.]

Population Aging - Longevity Science

The vast range of maximum lifespan differences between species provides convincing evidence that longevity is genetically influenced. An elephant lives about 10–20 times longer than a mouse, yet both animals have roughly the same number of lifetime heartbeats — the elephant at 30 per minute and the mouse at 300 per minute.
