American Hospital Association Depreciation Guide

The American Hospital Association (AHA) is the national organization that represents and serves all types of hospitals, health care networks, and their patients and communities. Nearly 5,000 hospitals, health care systems, networks, other providers of care and 43,000 individual members come together to form the AHA. Our vision is of a society of healthy communities where all individuals reach ...

Home | AHA

AHA Data represents information that is directly provided by nearly 6,300 hospitals and more than 400 health care systems. Our data warehouse covers an array of data points, including demographics, operations, service line, staffing, c-suite information, expenses, physician organization structures, beds, utilization and more. Historical data sets are available for many of these tools.

AHA Data Products - American Hospital Association

Computing depreciation requires two types of information: > A record that reflects the cost or value of the hospital's assets > A life over which financial executives expect the asset to be useful Many hospitals in the 1960s did not have this information, so it needed to be
