Relationships With Industry and Other Entities—The ACC and AHA exclusively sponsor the work of GWCs, without commercial support, and members volunteer their time for this activity. The Task Force makes every effort to avoid actual, potential, or perceived conflicts of interest that might arise through relationships with industry or other entities (RWI).

1. Introduction. The use of Cannabis spp. and its various products have long been controversial, with opponents of the relaxation of restrictions pointing to studies linking long-term use to mental health problems (), and advocates arguing that it provides many therapeutic benefits (Ashton, 2001; Madras and World Health Organisation, 2015). Supporters of the decriminalization and legalization ...

Positron-emission tomography (PET) is a nuclear medicine functional imaging technique that is used to observe metabolic processes in the body as an aid to the diagnosis of disease. The system detects pairs of gamma rays emitted indirectly by a positron-emitting radioligand, most commonly fluorine-18, which is introduced into the body on a biologically active molecule called a radioactive tracer.
