A partial differential equation (PDE) is a differential equation that contains unknown multivariable functions and their partial derivatives. (This is in contrast to ordinary differential equations, which deal with functions of a single variable and their derivatives.) PDEs are used to formulate problems involving functions of several variables, and are either solved in closed form, or used to ...

This page lists some sources for books on the Web. There are a few electronic books already available, but the primary sources remain the publishers whether fully commercial or university publishers; in addition, book dealers can provide out-of-print and antiquarian material. Of course, libraries are the most important resource for the literature of mathematics.
