ISSN 2229-5518 A rapid overview of coastal erosion in Ghana

The erosion of rock formations in the water, coral reefs, and headlands create rock particles that the waves move onshore, offshore, and along the shore, creating the beach. Continual erosion of the shoreline by waves also changes the beach over time. When larger and stronger waves hit the shoreline, such as in a storm, more shoreline is eroded.

Building Beaches | Science Project

Researchers have long understood that global sea level rise will affect the rate of coastal erosion. However, new research from scientists at UH Mānoa and the state Department of Land and Natural Resources ...

New research predicts a doubling of coastal erosion by mid ...

Soil erosion is partially caused by runoff, or water that flows over the surface of the ground after the soil is saturated, or unable to absorb any more water. One way to help combat soil erosion is through the use of plants. Plants have extensive root systems that can help "grab on" to soil and keep the soil clumped together.

Can Plants Stop Soil Erosion? | Science Project
