After the Windows 7 Pro Workstation has been joined to the domain, given the same Hostname and IP address and permissions according the BESx installation guide, I installed BESx on it and it worked first time round including communicating perfectly with Microsoft Exchange 2010. All I needed to do was to restore the database and we are done.

**Replace and Upgrade Blackberry Enterprise Server Express ...**

Click on "Install BES Clients" > "Install Locally" in the BES Installation Guide or, alternately, run the BES Client installer manually from the install location (default "C:\BESInstallers\Client") by running setup.exe. Follow the installation instructions. For the other computers in your network, you have multiple options to deploy BES Clients.
