Best Autoguider and Guide Scope for 2019 - Astronomy Online

What you need to start Autoguiding. The autoguiding camera is connected to this smaller telescope and your computer. The main objective for this equipment is to focus and lock onto a star in the guide telescope's field of view. The camera takes continuous short exposure frames and displays the "live" video feed on your computer screen.

Autoguiding a Telescope for Deep Sky Astrophotography ...

Autoguider. An autoguider is an automatic electronic guidance tool used in astronomy to keep a telescope pointed precisely at an object being observed. This prevents the object from drifting across the field of view during long-exposures which would create a blurred or elongated image.

Autoguider - Wikipedia

Making sure a telescope is accurately aligned is a very important step when doing astrophotography and these telescope autoguiders can help. Autoguiders are small sensor cameras that track stars so the astrophotographer can monitor drift alignment before taking their exposures.

Telescope Autoguiders | Astrophotography Autoguiders

A separate guide scope and guide camera. An off-axis guider that splits off light collected by the main telescope, but which directs the light to a separate guide camera that detects a guide star somewhere in the same field of view as the main object that's being imaged.
