We investigate how government equity ownership in publicly traded firms affects the cost of corporate debt. Using a sample of bond credit spreads from 43 countries over 1991–2010, we find that government ownership is generally associated with a higher cost of debt, consistent with state-induced investment distortions, but is associated with a lower cost of debt during financial crises and ...

The history of photography began in remote antiquity with the discovery of two critical principles: camera obscura image projection and the observation that some substances are visibly altered by exposure to light. There are no artifacts or descriptions that indicate any attempt to capture images with light sensitive materials prior to the 18th century.

Big Oil plans to spend nearly US\$5 trillion in capital expenditure over the next decade, much of which would go into adding new production. Yet this money will also bring the world farther from the Paris Agreement climate targets, a report from energy industry-focused nonprofit Global Witness warns.
