Air Conditioning Installation Guide

Air conditioning installation is time consuming and requires that you follow a number of steps so that the unit works properly and efficiently. Step 1 - Locate the Indoor Unit. With an indoor air conditioning unit, the positioning of the unit is important for a good air conditioning installation. There should be no pipes around, good air circulation and the unit should not close to any doorways.

Air Conditioning Installation Guide | DoItYourself.com

The most common type of central air conditioning is the split system, which features a large, boxy condenser outside the home and a fan-and-coil system inside, connected by pipes carrying refrigerant. The air is distributed through ductwork. However, not every home can accommodate the ductwork needed to install central air.

Central Air Conditioning Buying Guide - Consumer Reports

Select an unobstructed location on your interior wall to mount the indoor air conditioning unit. Avoid direct sunlight and heat sources. Avoid locations where gas may leak or where oil mist or sulphur exists. The indoor unit requires at least 6" (15 cm) of open space surrounding its top and sides.

How to Install a Split System Air Conditioner: 14 Steps

Geothermal, also called ground source, heat pumps pull heat from or deposit heat into the earth to supply heating or cooling. Packaged air conditioners: Packaged air conditioners combine electric air conditioning and a heat pump, or heating plus cooling equipment. These units sit on the rooftop or just outside the home or commercial building.
