Aux Battery Retrofitting Guidelines Sprinter

Aux Battery Retrofit Guideline (MY '07 - '13) Sprinter Sales Engineering & Regional Upfitter Center . 2 Sprinter 8/20/2013 The specifications, descriptions, information, and recommendations contained in this bulletin are believed to be ... If an aux battery (code E28) is installed an electrical connector is located inside the driver seat ...

Aux Battery Retrofit Guideline (MY '07 ... - Sprinter RV

I went with this size wiring to minimize voltage drop back to the aux battery bank. Currently, there is an additional Class T fuse (not shown in the image I posted above) so that the aux battery bank is fused in two directions: 1. back to the starting battery and alternator, 2. and to the positive bus bar, off which all 12v devices are powered.

Parts to Order for Aux. Battery Retrofit [Archive ...

Tapping in to the Sprinter van's battery. ... If you want additional information about how the aux battery works, take a look at the Retrofit guidelines for auxiliary battery in NCV3 Mercedes Sprinter. It shows the location and function of each of the components. Share this:

Tapping in to the Sprinter van's battery - Sprinter ...

You can read what's required in the Retrofit guidelines for auxiliary battery in 2007+ NCV3 Mercedes Sprinter or Retrofitting an auxiliary battery with isolation relay in a pre-2007 T1N Sprinter. These guidelines show how the auxiliary battery is fitted in Sprints, and list the parts needed to do a factory-style job.

6. Electrics/Electronics Electrical and electronic ...

If you note from the diagram I posted, the cabling from the aux battery does not show any factory installed splice points at all, so as it comes from the factory it would seem that the aux battery is in parallel with the main battery when the engine is running and sits by itself, unused for anything when the engine is off.

Topic: Sprinter Auxiliary Battery - RV.net

Also, the isolator for the aux battery is designed to support a second (aux) battery of exactly the same size and attributes as the starter battery. That way, the charge current for both batteries can be the same. If you added four large batteries instead of the one 95Ah battery, the alternator is going to work longer and harder to charge those.
