Allison Warner-Adirondack Museum's Boat Builder-in-Residence Allison has been the Museum's boat builder-in-residence for the past eight summers. Since guideboats are almost entirely built by hand they require the builder to master the use of hand tools.

Building a Traditional Adirondack Guideboat

The famous Adirondack guideboat builders were in a class by themselves. They were skillful artists possessing a highly advanced talent in the technical sense of refined carpentry. Each builder kept his own set of patterns which reflected his individuality and clearly defined the lines and style of his craft.

Guideboat builders - Historic Saranac Lake - LocalWiki

Adirondack Guideboats were made for about a century without any epoxy at all - and still are built that way today. But now one can build them in several ways. A strip built AG would be similar to a strip built canoe. You might ask on the Bear Mountain forum, where those are the specialty. Good luck!

Adirondack Guideboat :: Builders' Forum

According to Wikipedia, the Adirondack guide boat is just that, it's a boat that was used in the Adirondacks by professional guides who had paying passengers, usually from New York City, who wanted to go hunting or fishing and they traveled up to the Adirondack region of upstate New York to do so.

Adirondack Guide Boat handmade from wooden boat plans ...

In 2003, the Adirondack Museum hired her to build guideboats in a workshop while visitors watch. She continues to build boats for the museum in the summer. In the off-season, she teaches math at North Country Community College. Warner also shares a shop with her partner, Rob Davidson, a carpenter whom she introduced to guideboat building.

Building on tradition - Adirondack Explorer

Adirondack Guideboats were developed by several different builders in the Adirondack region of upper New York state during the late 1800's when the area was a popular summer retreat for affluent residents of New York and Philadelphia.

Guideboat

The Adirondack Guideboat is a flat-bottomed boat with a deep 'V'-shaped hull. It is symmetrical side-to-side and end-to-end. Bearing sharp stems on either ends, it is a true double-ender. The hull is lap-straked with a beveled overlap, making it smooth-skinned. The ribs and stems are sawn from the natural crooks of spruce roots.
