Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Building construction doesn't begin with breaking ground and excavating a site. Whether building a skyscraper, a home, or a monument, builders must consider the suitability of the construction site, environmental factors like earthquakes and tsunamis (geography, earth science), the properties of building materials (physics, structural engineering), the aesthetics of a design (visual arts ...
