Choose the one alternative that best completes the statement or answers the question. 1. In a centrifuged blood sample, the buffy coat between the formed elements and the plasma contains:

anatomy: chapter 10

The best-known feature of skeletal muscle is its ability to contract and cause movement. Skeletal muscles act not only to produce movement but also to stop movement, such as resisting gravity to maintain posture.

10.2 Skeletal Muscle - Anatomy and Physiology

Muscle is one of the four primary tissue types of the body, and the body contains three types of muscle tissue: skeletal muscle, cardiac muscle, and smooth muscle (). All three muscle tissues have some properties in common; they all exhibit a quality called excitability as their plasma membranes can change their electrical states (from polarized to depolarized) and send an electrical wave ...
