Overview. The most basic type of integral equation is called a Fredholm equation of the first type, $\int_a^b f(x) \phi(x) dx = \lambda \int_a^b K(x, y) \phi(y) dy$. The notation follows Arfken. Here ϕ is an unknown function, f is a known function, and K is another known function of two variables, often called the kernel function. Note that the limits of integration are constant: this is what characterizes a Fredholm equation.

Legendre polynomials

In physical science and mathematics, Legendre polynomials (named after Adrien-Marie Legendre, who discovered them in 1782) are a system of complete and orthogonal polynomials, with a vast number of mathematically beautiful properties, and numerous applications. They can be defined in many ways, and the various definitions highlight different aspects as well as suggest generalizations and ...
