I have a 2003 Ford Expedition with a 5.4 150k . I bought it about a year ago. Im having a hard start issue where it will crank about several times and then starts, Once it starts it sputters a bit and then smooths out. It runs perfect and idles perfect, I dont have any power issues and overall is a good vehicle.

Hard Starting Issue | Ford Expedition Forum

My 2003 Expedition (5.4L) won't start. No noises at all when turning the key but radio works, all lights come on, even the door open chime sounds. Started it twice earlier today without problems. Even turned the key to start and took the tranny out of park and put it back into park. Still won't start.

My 2003 Expedition (5.4L) won't start. No noises at all ...

Gas smell means the problem could be ignition related whereby ignition sparks are not available. For intermittent problems, it is never easy to detect especially when no trouble codes are present and by the time you are about to test for problems, the engine would start normally. If you can crank the engine, it definitely is not the starter.
