Amqp Document

This specification defines an "amqp" URI scheme. Conforming URIs represent the information needed by AMQP 0-9-1 clients as well as some RabbitMQ plugins to connect to RabbitMQ server. The scope of this specification is limited to AMQP 0-9-1, the original protocol implemented by RabbitMQ. An AMQP 0-9 ...

RabbitMQ URI Specification — RabbitMQ

Confirms (aka Publisher Acknowledgements) are a lightweight way to know when RabbitMQ has taken responsibility for messages. Blocked Connection Notifications allows clients to be notified when a connection is blocked and unblocked ...

Protocol Extensions — RabbitMQ

This document contains system requirements for IBM MQ V9 Long Term Support and Continuous Delivery releases.

System Requirements for IBM MQ V9

Next, the publisher creates two AMQP links for sending the SAS token and receiving the reply (the token validation result) from the service. The AMQP message contains a set of properties, and more information than a simple message.

In my series of DocumentDB I will discuss more advanced features of DocumentDB. This post covers concurrency options for DocumentDB but starts with an overview of the problems with concurrency in general. Concurrency options in DocumentDB What is concurrency? Consider the scenario that you have a hotel room booking application. You have a web site that allows people...

DocumentDB revisited Part 3 - Peter in the Azure sky

I am currently creating a dispatch document for a client. My client is a third party warehouse, in other word they store clients products. The Dispatch is to request that items are picked and delivered to the customers client.

OASIS - UBL XML.org | Online community for the Universal ...

I think there's an intrinsic attitude among tech people to make things better, to see actual results. Particularly with automation, when you show a colleague how they can stand up a test environment in just a few steps, you don't need metrics—you can see on their face how happy they are with what the technology can do.
