Can the laws of physics untangle traffic jams, stock markets, and other complex systems? In a series of papers, Rochester professor Gourab Ghoshal and members of his lab are using the fundamental laws of physics to untangle the complex systems behind human behavior, urban planning, and social networks.

The Great Debate, also called the Shapley-Curtis Debate, was held on 26 April 1920 at the Smithsonian Museum of Natural History, between the astronomers Harlow Shapley and Heber Curtis. It concerned the nature of so-called spiral nebulae and the size of the universe; Shapley believed that distant nebulae were relatively small and lay within the outskirts of Earth's home galaxy, while Curtis ...

Astronomy & Astrophysics: Planck 2013 results

Cosmic voids are vast spaces between filaments (the largest-scale structures in the universe), which contain very few or no galaxies. Voids typically have a diameter of 10 to 100 megaparsecs; particularly large voids, defined by the absence of rich superclusters, are sometimes called supervoids. They have less than one tenth of the average density of matter abundance that is considered typical ...
