The traction off comes on when the abs light is on to show it has been disabled. The traction control uses the abs sytem to help control it. The most common reason that this happens is a bad wheel speed sensor which is all part of a bearing hub assembly. You can also check the wires going to the abs sensors to make sure none of them were damaged.

Best Answer: If your ABS light is on, it means that there is a problem with your ABS system. If you needed to brake hard, your ABS would not work and you would skid and possibly lose control of the vehicle. A lot of times the problem is fairly simple like a dirty or bad wheel speed sensor, but regardless, you need to have it checked out.
