Anyone know about Airguide model # 656 tach it is 0 to 8000 with four wires out the back, black, red, yellow, and green. It looks like a smaller version of the early Sun tach. I want to run it on my flathead 8 ba, 12 volt negative ground.

**Airguide tachometer | The H.A.M.B.**

Started out as the top pick for construction and retrofit projects in coastal states throughout the U.S., AirGuide manufactures the most reliable, energyefficient and sustainable all-aluminum grilles, registers, and diffusers in the business, serving the worldwide market.

**Airguidemfg**

That is the same wire I would connect to the tach. At least that's what I did when I was running a 1956 Javelin. The sender has four wires. Two go to the motor and two go to the tach. The critical part is identifying which two go to the motor and which go to the tach. If you have this right then you can just move the wires around until the tach ...

Yes, I did a search. My daughter bought this tach online for her 34 for \$25. On the face it says Airguide Model number 656 AND 657. I did a search on here and there is a post where a guy says the 656 model needs a sender, however, I couldn't find anything on a 657.

**Old Airguide Tach help | The H.A.M.B.**

I have the original Airguide speedo/tach combination that was installed on my '60 center deck. I'd like to reuse it but need to replace the tach wiring gnawed off by some malicious rodent. Here's my question. The side of the control unit where the wires enter is sealed with what looks a pourable plastic of some sort.
