Algebra (from Arabic "al-jabr", literally meaning "reunion of broken parts") is one of the broad parts of mathematics, together with number theory, geometry and analysis. In its most general form, algebra is the study of mathematical symbols and the rules for manipulating these symbols; it is a unifying thread of almost all of mathematics. It includes everything from elementary equation solving ...

Below are a number of worksheets covering elementary algebra problems. Elementary Algebra is about manipulating mathematical expressions, with quantities represented by symbols e.g x , y or z . Using symbols instead of numbers makes it possible for work in a general rather than a specific way, and it allows us to manipulate and rewrite the relationships between quantities in different ways.

A linear system of equations is a set of n linear equations in k variables (sometimes called "unknowns"). Linear systems can be represented in matrix form as the matrix equation $Ax=b$, (1) where A is the matrix of coefficients, x is the column vector of variables, and b is the column vector of solutions. If $k < n$, then the system is (in general) overdetermined and there is no solution.
