Agricultural chemistry is the study of both chemistry and biochemistry which are important in agricultural production, the processing of raw products into foods and beverages, and in environmental monitoring and remediation. These studies emphasize the relationships between plants, animals and bacteria and their environment. The science of chemical compositions and changes involved in the ...

Agricultural chemistry - Wikipedia

We report our results by broad geographic regions. We used the regions as defined by Brummit (2001), dividing the globe into 50 plant distributional regions (). We selected this scheme, because (1) it is an international standard for plant geographical distributions, (2) it follows political boundaries (countries and large subnational areas), which facilitates linking the areas with census and ...

INTRODUCTION: While new studies on the negative effects of pesticides on human health are completed each year by major government and university research centers, the majority of these studies remain "silent" in medical journals and do not reach the public via major news outlets. This reduction in public awareness appears to have worsened over the past several decades.
