Vintage Midcentury Mahogany Airguide Banjo Wall Barometer ...

A barometer measures air pressure and can forecast the weather within a 12 to 24 hour period. Air pressure can be measured in inches of mercury, millimeters of mercury, or hectopascals, depending on where you live and the gauge on the instrument. In order to tell whether air pressure is rising or falling, you must calibrate the barometer correctly.

How to Set a Barometer: 12 Steps (with Pictures) - wikiHow

Antique barometers with elaborate wooden cases and brass trim are the most desirable. Mercury column barometers are also popular with collectors. There are three types of thermometers: mercury-based, water-based, and aneroid. It is difficult to find someone to repair a broken barometer, so be sure to buy a barometer in working condition.

Our president at Weems & Plath, Peter Trogon, takes time to show how to calibrate a few of our barometers. This video is helpful in showing how to determine what the pressure of the barometer ...

Calibrating Your Barometer

Antique and Vintage Barometers. The other type of mercury barometer is a siphon barometer, whose glass tube is U-shaped rather than straight, obviating the need for a cistern. In either case, glass barometers are fragile, so they are usually mounted to a piece of mahogany or other decorative hardwood.
