Phrenology (from Ancient Greek φρήν (phrēn), meaning 'mind', and λόγος (logos), meaning 'knowledge') is a pseudoscience which involves the measurement of bumps on the skull to predict mental traits. It is based on the concept that the brain is the organ of the mind, and that certain brain areas have localized, specific functions or modules. Although both of those ideas have a basis in ...

The Science Three-Level Hypothesized Explanation of the IM effect (McGrew, 2012). Interactive Metronome ® (IM) is believed to improve the resolution and efficiency of an individual's internal brain clock(s) and temporal processing. In turn, it is hypothesized that this results in more efficient brain connectivity, communication, and synchronization via increased integrity of the brain's white ...

Carers play a vital role in supporting family members who are sick, infirm or disabled. 1 There is no doubt that the families of those with mental disorders are affected by the condition of their near ones. Families not only provide practical help and personal care but also give emotional support to their relative with a mental disorder.
