Efficient methods, accurate labor standards and preseason style costing are fundamental to the success of a sewn-products facility. GSD provides fast, accurate rates in a fraction of the time compared with other systems. For every facility and style change option, GSD allows pre-costing of various stages of manufacturing.

GSD - 7 Benefits in one System - General Sewing Data

The bed of a sewing machine is that part of the sewing machine on (or against) which the fabric rests while it is being sewn. The classification of sewing machine bed types or shape types is done based on the manner in which the fabric falls, behaves and travels with respect to the bed during the course of sewing (Solinger, 1988), to enable easier movement of materials around the machine (Carr ...
