The most commonly discussed effect of paper wealth is the wealth effect: as people (households) increase in wealth, they are likely to spend more, while if their wealth decreases, they are likely to spend less. This is termed "the wealth effect" (compare income effect), and is generally attributed to psychological feelings of confidence – one feels rich, so one spends.

Alas, I have not posted very much of late. But, it's only because I am trying to find as much time as possible to write my book describing a simple, comprehensive and robust basis of accounting that any public company could use; and that would produce more relevant information for investors than U.S. GAAP or IFRS. Progress has been slower than I had hoped, but to-date I have drafted the ...
