The importance of pKas in organic chemistry can't be overestimated, in my opinion. Not knowing pKa's in organic chemistry is like not knowing the value of the hands in poker. In this scheme, alkyl anions are the equivalent of the royal flush – they win the proton from everything underneath them in the table.

The pKa Table Is Your Friend - Master Organic Chemistry

So it doesn't state what classification you got? How strange... I suppose that's due to the fact that at Oxford and Cambridge one takes parts and it is only by convention that the classification of one part is taken to be the final classification of the degree not be official rule of the university (therefore to be accurate then for such degrees one must give the classifications of each part ...
