The St. Petersburg paradox or St. Petersburg lottery is a paradox related to probability and decision theory in economics. It is based on a particular (theoretical) lottery game that leads to a random variable with infinite expected value (i.e., infinite expected payoff) but nevertheless seems to be worth only a very small amount to the participants. The St. Petersburg paradox is a situation ...

Intelligence To be intelligent you first have to know what being intelligent is. And you also have to know what being ignorant is. Ignorant is just another word for "Not knowing". But not knowing is not always obvious or clearly understood. That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.
