Barcode Label Software Manual & Tutorial - IDAutomation

NB The downside of using this option is that any legitimate ~d sequences in the data (a ~ immediately followed by lower-case d) will be mistaken for escaped character lead-in characters. In that very unlikely situation, the ~ character must be coded as ~d126 only when using this option. NB When this option is set to No Escaping, any ~dxxx-formatted sequences will be encoded into the barcode as ...
