Parkinson's disease (PD) is a progressive, neurodegenerative disease that presents with significant motor symptoms, for which there is no diagnostic chemical test. We have serendipitously identified a hyperosmic individual, a "Super Smeller" who can detect PD by odor alone, and our early pilot studies have indicated that the odor was present in the sebum from the skin of PD subjects.

Analysis of U87MG secretome from serum-containing (SCM) and serum-free media (SFM). (a) Schematic workflow for quantitative analysis of U87MG secretome between SCM and SFM.DDA: data-dependent ...

Comparative analysis of differentially secreted proteins ...

A key problem in the early 20th century entailed reconciling actual processes on the crystal surface itself with the early findings of Gibbs, 1876, Gibbs, 1878.He introduced the notion that the "equilibrium form" of a crystal of fixed volume was one that minimized the cumulative energy of the crystal faces and their mutual intersections.

Kinetic concepts for quantitative prediction of fluid ...

Consider the electoral behavior of American whites, and especially their inclination to support either Democratic or Republican candidates. Because of gerrymandering, most individual congressional districts are overwhelmingly aligned with one party or another, and general elections are a mere formality; this is often also true of statewide races for senator or governor.

Race and Crime in America, by Ron Unz - The Unz Review

Bioinformatics / , b aɪ . ɒ s , ɪ n f ə r ' m æ t ɪ k s / is an interdisciplinary field that develops methods and software tools for understanding biological data. As an interdisciplinary field of science,
