2000 Ford Expedition Heater Problems

I have a 2000 ford expedition that has had no heat for the last two years. I tried thermostats and flushed and flushed the system again and again. Flushed the heater core again and again. No heat. Changed the waterpump too. No heat. Flushed the heater core. No heat. And yes at operating temperature both heater hoses were hot. But no heat.

FORD EXPEDITION Problems - 2000 FORD EXPEDITION Electrical ...

check closer to just underneath the firewall--it could be a smaller problem than a heater core--Ford 4.6--5.4 engines have a tube just underneath the intake manifold that the rubber hose goes bad and it will leak towards the back of the engine. Lets hope so--what I hear its very expensive to change a heater core in an Expedition.
