FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

Science 4-5 - SolPass

The study guides are incomplete, so students will be given time in class to complete them. We will go over the answers in class and students are expected to correct any errors on their own. Students may access an additional blank study guide or completed study guide below.
