The most common type of connector used for both Standard-quality video and HD video, it uses three coaxial RCA cables and plugs color-coded red, green and blue (the three cables may be wrapped together for convenience) to carry analog Standard- or High-Definition video between a set-top satellite or cable-TV box to the A/V receiver and TV display or projector.

Audio/Video Cables and Connectors Explained - ecoustics.com

Audio connectors and video connectors are electrical or optical connectors for carrying audio and video signals. Audio interfaces and video interfaces define physical parameters and interpretation of signals. For digital audio and digital video, this can be thought of as defining the physical layer, data link layer, and most or all of the application layer. ...

Audio and video interfaces and connectors - Wikipedia

RCA Composite Video Audio cables are excellent for connecting your VCR, DVD, HD-TV, and all other home theater audio/video equipment. These high performance cables are colored for easy installation and identification of video and left and right channels and are 100 percent shielded offering superb protection against EMI/RFI interference.

Cable Types and Their Differences Home audio conductors fall into two broad categories, interconnects and speaker cables. The former connect the source (turntable, CD player, tape deck, music server, tuner, and so on) to the control center (preamp, receiver, or integrated amplifier), as well as the preamp to the power amplifier.

Make Your Own Silver Audio Cables - L'Aventure

SHIELDED CABLE (STP) vs UNSHIELDED CABLE (UTP) Cat 5E cables are most commonly utilized with unshielded twisted pairs (UTP). However, environments with large motors, generators, and certain types of high-voltage lighting are major sources of Electromagnetic and Radio Frequency Interference (EMI/RFI).
