The CRASH 2 trial showed improved outcomes in trauma from the administration of the antifibrinolytic drug tranexamic acid. A further analysis of the data has shown that benefit was only seen in CRASH-2 when tranexamic acid was administered within 3 hours of injury 1.. An accompanying editorial 2 makes the following interesting points:. Acute traumatic coagulopathy is a hyperacute process in ...

Cardiac arrest is a sudden loss of blood flow resulting from the failure of the heart to effectively pump. Symptoms include loss of consciousness and abnormal or absent breathing. Some individuals may experience chest pain, shortness of breath, or nausea before cardiac arrest. If not treated within minutes, it typically leads to death.. The most common cause of cardiac arrest is coronary ...

Major trauma is any injury that has the potential to cause prolonged disability or death. There are many causes of major trauma, blunt and penetrating, including falls, motor vehicle collisions, stabbing wounds, and gunshot wounds. Depending on the severity of injury, quickness of management and transportation to an appropriate medical facility (called a trauma center) may be necessary to ...

INTRODUCTION — Every year, drowning accounts for at least 500,000 deaths worldwide, including approximately 4000 fatalities in the United States [1]. Statistics for nonfatal drowning are more difficult to obtain, but nonfatal drowning events may occur several hundred times as frequently as reported drowning deaths [1]. Drowning and its management are reviewed here.
