Best Autoquider

This might just be a tiny bit, but using an autoguider can solve this problem. The guide scope is a small telescope, sometimes as small as a finder, which the camera uses to see the stars. Now lets take a look at some telescope reviews! Best autoguider and guide scope packages Astromania Camera Easy Autoguiding Set50 \$284

Best Autoguider and Guide Scope for 2019 - Astronomy Online

If the issues are severe enough, even autoguiding won't help. For this reason, its always best to invest in a quality telescope mount that has been proven to be a reliable choice for deep sky astrophotography. Thankfully, basic autoguiding is enough to correct most of the issues associated with modern equatorial mounts.

Autoguiding a Telescope for Deep Sky Astrophotography ...

Standalone Autoguiders: Which one is best and why? - posted in Cameras: Guys, Im hunting around for a decent standalone AG. Anyone know which is best and why? My mounts are: NEQ6, Paramount GT1100, Titan 50 and a homemade 500kg payload GEM with ST-4 input. Thanks, James

Standalone Autoquiders: Which one is best and why ...

The choice of guide scope also has an influence on the guiding camera. More sensitive cameras, while they may cost more, can relax the aperture and weight requirements of the guide scope. And while nearly any astronomy camera can be used as an autoguider, cameras with monochrome sensors, small pixel size, and high sensitivity work best.

Selecting a Guide Scope and Autoguiding Camera for ...

Making sure a telescope is accurately aligned is a very important step when doing astrophotography and these telescope autoguiders can help. Autoguiders are small sensor cameras that track stars so the astrophotographer can monitor drift alignment before taking their exposures.

The Orion StarShoot AutoGuider's sensor is a high-resolution, 1/2" format 1.3-megapixel CMOS monochrome chip, with 5.2 micro x 5.2 micro pixels for highly accurate guiding. That high accuracy due to the small pixel size means you can use the AutoGuider with smaller, less expensive guide scopes than is possible with other guide cameras.

Amazon.com: Orion Starshoot AutoGuider: Telescope ...

As both the imaging camera and guide camera are attached to the same mount, errors are corrected for both cameras, ensuring accurate tracking while imaging. However, the SynGuider is slightly different. It is a stand-alone autoguider, one that doesn't need a laptop or software to operate; all that's needed is a second telescope.
