Berkeley Db Java Edition
Oracle Berkeley DB Java Edition. Berkeley DB Java Edition is a high performance, transactional storage engine written entirely in Java. Like the highly successful Berkeley DB product, Berkeley DB Java Edition executes in the address space of the application, without the overhead of client/server communication. It stores data in the application's native format, so no runtime data translation is ...

Oracle Berkeley DB Java Edition | Oracle Berkeley DB
Oracle Berkeley DB Java Edition is an open source, embeddable, key-value database written entirely in Java. Like Oracle Berkeley DB, Oracle Berkeley DB Java Edition executes in the address space of the application, without the overhead of client/server communication.

Berkeley DB Java Edition | Database | Oracle
The Oracle Berkeley DB Java Edition storage backend runs in the same JVM as JanusGraph and provides local persistence on a single machine. Hence, the BerkeleyDB storage backend requires that all of the graph data fits on the local disk and all of the frequently accessed graph elements fit into main memory.

Space: Berkeley DB Java Edition | Oracle Community
Berkeley DB (BDB) is a software library intended to provide a high-performance embedded database for key/value data. Berkeley DB is written in C with API bindings for C++, C#, Java, Perl, PHP, Python, Ruby, Smalltalk, Tcl, and many other programming languages.BDB stores arbitrary key/data pairs as byte arrays, and supports multiple data items for a single key.

Berkeley DB - Wikipedia
GUI for Berkeley DB [closed] Ask Question 12. 2. I'm using Berkeley DB Java edition, via the DPL interface. I want to ask if someone knows about any GUI library that could make it easy to browse the data saved in the database. I know that BDB documentation says that the metadata about the stored entities is not saved in any place and therefore ...
