Property Description; protected-routerboot (enabled | disabled; Default: disabled): This setting disables any access to the RouterBOOT configuration settings over a console cable and disables operation of the reset button to change the boot mode (Netinstall will be disabled).Access to RouterOS will only be possible with a known RouterOS admin password.

Manual:RouterBOARD settings - MikroTik Wiki

Note: RouterOS password can only be reset by reinstalling the router or using the reset button (or jumper hole) in case the hardware is RouterBOARD. For X86 devices, only complete reinstall will clear the password, along with other configuration. For RouterBOARD devices, several methods exist, depending on our model.
