ABAP Selection Screen - Part 5 - SAP Tutorial

Hello ABAPers, I have a requirement to attach a search help to "select-options" . When I checked the table corresponding to the field of select-options,I found that there is no search help assigned for that field.. I have tried using AT Selection-screenON VALUE-REQUEST and Matchcode Object .. However, Matchcode Object requests for standard search help name.

Attaching a search help to a selection screen "Select-options"

Selection screens are special screens that are defined with the help of ABAP statements. The main purpose of the selection screen is to enable the user to control the database selections of the report program. The selection screen is part of a report program that you can design for interactive input of field values and selection criteria.
