Linux Mint can be thought of as filling the same role as Microsoft's Windows, Apple's Mac OS, and

the free BSD OS. Linux Mint is also designed to work in conjunction with other operating systems (including those listed above), and can automatically set up a "dual boot" or "multi-boot" environment (where the user is prompted as to which

Official User Guide - Linux Mint
The main difference between bash and most other programs is that unlike them, bash was not programmed to perform a certain task. Bash was programmed to take commands from you, the user. To do so efficiently, a "language" was created which allows users to "speak" to the bash program and tell it what to do.
